

Ceiling-Mount Smoke Detector

This ceiling-mount smoke detector provides early warning of fire hazards. It uses internal sensors to detect smoke particles.

Overview

Reliable Fire Detection

This ceiling-mount smoke detector is designed for early fire hazard warning in commercial and residential environments. Featuring a sleek, white, circular design, it integrates seamlessly into any ceiling installation. The device includes essential user-interface elements like a test button and clear instructional markings to ensure ease of maintenance and operational readiness.
