

Ceiling Mount Tubular Exhaust Fan

This ceiling-mounted tubular ventilating fan is designed for air extraction and ventilation. It is suitable for bathroom or utility room ventilation.

Overview

Efficient Ceiling Ventilation

This ceiling-mounted tubular exhaust fan is engineered for effective air extraction in residential and commercial spaces. Featuring a sleek square grille with a concentric pattern, it integrates seamlessly into modern bathroom or utility room ceilings. The side-mounted tubular duct connector ensures straightforward installation and reliable performance for maintaining air quality.

Design & Construction

Grille Features

- Square grille design
- Concentric square patterns
- Central air intake opening

Mounting Type	Ceiling Mount
Fan Design	Tubular Ventilating Fan

Technical Specifications

Exhaust Connection	Side-mounted tubular duct connector
