

Ceiling-Mounted Exhaust Fan for Ventilation

This ceiling-mounted exhaust fan is designed for residential and commercial ventilation. It is suitable for removing moisture and odors from areas like bathrooms and kitchens.

Product Overview

High-Efficiency Ventilation Solution

This ceiling-mounted electrical exhaust fan is engineered to provide reliable air circulation for both residential and commercial environments. Designed for effective moisture and odor removal, it features a durable construction and a discreet, functional aesthetic. With its integrated duct connection and easy-to-install design, this unit serves as an essential component for maintaining air quality in bathrooms, kitchens, and other confined spaces.

Technical Specifications
