

Ceiling-Mounted HVAC Ventilation Unit

This ceiling-mounted unit provides both refrigeration and ventilation. Designed for HVAC systems, it features a square panel with multiple vents and is installed within a suspended ceiling.

Product Overview

High-Efficiency Ceiling HVAC Unit

This ceiling-mounted ventilation and refrigeration unit is engineered for seamless integration into suspended ceiling grids. Designed for professional environments, it features advanced airflow control technology to ensure consistent air distribution. The unit prioritizes environmental safety and occupant comfort through its compliant design and ultra-quiet operation capabilities.
