Product Overview

High-Efficiency Ventilation Solution

This ceiling-mounted ventilation fan is engineered with a high-performance, all-copper AC motor designed for energy efficiency and low temperature operation. It features an advanced high-pressure multi-blade impeller housed within an integrated metal box, ensuring ultra-quiet performance and an extended air supply distance. Ideal for bathrooms, kitchens, and enclosed spaces, this unit provides effective removal of moisture, odors, and pollutants.

Technical Specifications

Motor Type	All-copper AC motor
Impeller Design	High-pressure multi-blade
Construction	Integrated metal box
