Product Overview

Automated Overwrapping Solution

This high-speed cellophane overwrapping machine is engineered to streamline the packaging process for a variety of box-shaped products. It fully automates the feeding, folding, and hot-sealing stages, while simultaneously applying a tear tape for convenient opening. Its versatile, modular design allows for rapid adjustment to different product sizes, offering significant space and cost efficiency for production lines.

Operational Capabilities

Automation Features

- Automated feeding and product handling
- Precision folding and hot sealing
- Integrated tear tape (golden line) application
- Automatic counting system

Sealing Quality

Tight Seal • Tamper-Evident • Transparent Finish

Compatibility & Design

Production Flexibility	Yes
Construction Material	Stainless Steel
Suitable Industries	Food & Beverage, Pharmaceuticals, Cosmetics, Consumer Goods
