

Central Air Conditioning Unit

This air conditioning unit is designed for central air conditioning systems. It distributes conditioned air through multiple ducts, making it suitable for residential or commercial HVAC applications.

Product Overview

High-Efficiency Central Air Conditioning

This central air conditioning unit is designed for seamless integration into residential or commercial HVAC systems. Featuring a robust metallic casing and a concealed ceiling-mounted design, it provides efficient climate control across multiple zones. The unit is engineered for durability and high-performance air distribution through its specialized duct connection system.

Design & Construction

Unit Type

Ceiling-Mounted • Concealed • Multi-Zone

Casing Material

Metallic

Technical Features

Vent Configuration

3 pcs

Circular Vents

System Application

- Central Air Conditioning
- Multi-zone Air Distribution
- Residential HVAC
- Commercial HVAC

Installation

Connection Type

Circular duct connections
