

Centreless Grinding Wheel

This abrasive grinding wheel is designed for centreless grinding applications. It features a durable construction and precise dimensions for accurate material removal and surface finishing.

Overview

Precision Centreless Grinding Wheel

This abrasive grinding wheel is engineered specifically for centreless grinding applications, ensuring consistent and accurate material removal. Its durable construction is designed to withstand rigorous industrial use while maintaining precise dimensions for superior surface finishing. Ideal for high-efficiency manufacturing environments requiring reliable, long-lasting tooling.

Technical Specifications

Application	Centreless Grinding
Primary Function	Material Removal and Surface Finishing
Key Features	Durable Construction, High Precision, Accurate Dimensions
