Overview

High-Performance Centrifugal Air Curtain

This centrifugal air curtain is engineered for demanding commercial and industrial environments, creating a powerful air barrier that effectively separates indoor and outdoor climates. By preventing the exchange of air, it helps maintain consistent indoor temperatures while keeping out dust, insects, and pollutants. Its robust construction and adjustable airflow settings ensure reliable, energy-efficient performance across various doorway sizes and installation heights.

Technical Specifications

Rated Voltage	220-240V
Rated Frequency	50-60Hz

Performance Metrics

Supported Installation Heights

- 3.0-3.5m
- 3.5-4.0m
- 4.0-4.5m

Air Speed Options

16 m/s
Low Speed

20 m/s
High Speed

Noise Levels	55dB, 57dB, 58dB, 60dB, 63dB, 64dB
