

Centrifugal Blower Fan for Electronics Cooling

This centrifugal blower fan delivers high-pressure air in a compact design. It features a durable plastic housing with mounting points, ideal for cooling electronic components and ventilation systems.

Product Overview

High-Efficiency Electronics Cooling

This centrifugal blower fan is engineered to provide high-pressure air delivery in a compact and durable form factor. It is specifically designed for cooling electronic components, ventilation systems, and other critical industrial applications requiring precise, directed airflow. The robust plastic housing and efficient impeller design ensure reliable performance and long-term durability in professional settings.

Technical Details

Airflow Mechanism	Centrifugal
Housing Material	Robust Plastic
Installation	Yes

Performance Metrics

Primary Applications	Electronics Cooling, Ventilation Systems, Industrial Cooling
----------------------	--
