

Centrifugal Clutch Assembly for Small Engines

Centrifugal clutch assembly designed for small engine applications. It features a robust construction with a metal housing and friction plates for efficient power transfer.

Product Overview

Centrifugal Clutch Assembly

This centrifugal clutch assembly is engineered for small engine applications, providing reliable and efficient power transfer. Designed to automatically engage and disengage based on engine speed, it ensures smooth acceleration and deceleration for the operator. Its robust construction, featuring a durable metal housing and high-quality friction plates, makes it an ideal solution for motorcycles, scooters, and various small vehicle platforms.

Technical Specifications

Suitable Applications	Motorcycles, Scooters, Small Engines
Engagement Type	Automatic (Speed-dependent)

Construction

Key Components

- Metal housing
- Friction plates

Housing Material	Metal
------------------	-------
