

Centrifugal Clutch Assembly

This multi-component clutch assembly features a centrifugal clutch mechanism. It includes friction pads, springs, and a central hub designed for power transmission.

Product Overview

Centrifugal Clutch Assembly

This centrifugal clutch assembly is designed for reliable power transmission in small engine and automotive applications. Featuring a robust construction with a perforated clutch bell, it ensures efficient heat dissipation and consistent engagement. The assembly includes essential components such as friction pads, springs, and a central hub, making it a comprehensive solution for drivetrain maintenance and performance.

Technical Specifications

Included Components

- Centrifugal clutch mechanism
- Perforated clutch bell
- Friction pads
- Engagement springs
- Central hub

Compatibility

100cc, 110cc

Transmission Type

3-Speed Automatic
