

Centrifugal Exhaust Fan with Squirrel Cage Impeller

This centrifugal fan is designed for exhausting air or providing forced draft. It features a squirrel cage impeller enclosed in a scroll-shaped housing and is suitable for industrial or commercial applications requiring high airflow at moderate pressure.

Overview

Industrial Centrifugal Exhaust Fan

This centrifugal exhaust fan is engineered for demanding industrial and commercial environments requiring reliable airflow management. Featuring a robust squirrel cage impeller housed within a precision-engineered scroll casing, it is designed to deliver consistent performance for exhaust or forced draft applications. Its durable construction ensures longevity in high-use settings, making it an ideal solution for facilities needing effective ventilation at moderate pressure levels.
