

Centrifugal Fan Blower Wheel Cage

This centrifugal fan blower wheel cage is designed for efficient air movement. Constructed from durable plastic, the cage features curved blades arranged around a central hub to optimize airflow and reduce noise.

Product Overview

High-Efficiency Air Movement

This centrifugal fan blower wheel cage is engineered for optimal air movement in demanding environments. Featuring a precision-designed array of curved blades around a central hub, it effectively maximizes airflow while minimizing operational noise. Its lightweight yet durable plastic construction makes it a reliable component for HVAC systems, ventilation equipment, and various air handling units.

Technical Specifications

Material	Durable Plastic
Design Features	Curved Blades, Central Hub, Lightweight, Noise Reduction

Applications & Use

Typical Applications

- HVAC Systems
- Ventilation Equipment
- Air Handling Units

Maintenance

Installation	Designed for easy installation and maintenance to ensure long-lasting reliability.
