

Centrifugal Fan Impeller

This black plastic centrifugal fan impeller is designed for various applications. Its design optimizes airflow and pressure generation.

Product Overview

Centrifugal Fan Impeller Design

This centrifugal fan impeller is engineered for high-efficiency air movement in HVAC systems and cooling devices. Featuring a robust radial blade configuration, it is designed to optimize both airflow and pressure generation. The durable plastic construction provides excellent resistance to corrosion, ensuring long-term reliability in demanding environments.

Technical Specifications

Material	Durable Plastic
Blade Design	Radial curved blades
Applications	HVAC Systems, Cooling Devices, Air-moving Equipment

Key Features

Performance Benefits

- Optimized airflow dynamics
- High pressure generation
- Corrosion-resistant construction
- Durable long-life materials
