

Centrifugal Pump Component with Mounting Bracket

This component is part of a centrifugal pump system. It includes a right-angle bracket for mounting and a cylindrical pin/shaft with a flange and retaining ring.

Product Overview

Industrial Centrifugal Pump Component

This durable metallic component is designed for integration into centrifugal pump assemblies. It features a robust right-angle mounting bracket with an integrated mounting hole for secure installation. The assembly includes a precision-engineered cylindrical pin or shaft, complete with a flange and retaining ring, facilitating reliable alignment and connection within industrial fluid handling systems.

Technical Specifications

Key Features

- Right-angle mounting bracket
- Integrated mounting hole
- Cylindrical shaft/pin assembly
- Flange and retaining ring

Component Type	Centrifugal Pump Accessory
Construction	Industrial-grade metallic
Application Suitability	Centrifugal Pump Systems, Industrial Machinery, Fluid Handling
