

# Centrifugal Split Case Pump

This centrifugal split case pump is designed for reliable fire protection service and high-capacity water transfer. It delivers high-volume water with stable performance, suitable for a wide range of fire suppression and industrial applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Centrifugal Split Case Pump

This centrifugal split case pump is engineered for heavy-duty fire protection and high-capacity water delivery services. Designed for reliability in mission-critical applications, it features a robust construction that ensures stable performance under high-pressure requirements. The split case design allows for efficient maintenance and easy access to internal components, making it an ideal solution for industrial fire suppression and large-scale water supply systems.

## Technical Standards

### Industry Certifications

NFPA20, UL, FM, EN12845, GB6245, CCCF

## Performance Specifications

### UL Certified Ratings

**500 GPM**

Min Flow

**8000 GPM**

Max Flow

**350 PSI**

Max Pressure

### FM Certified Ratings

**500 GPM**

Min Flow

**7000 GPM**

Max Flow

**350 PSI**

Max Pressure

## Technical Specifications

### Material Composition

- Cast iron casing
- Stainless steel impeller
- Mechanical seal

### Primary Applications

Fire Suppression • Water Supply • Industrial Processing • Irrigation
