

Centrifugal Water Pump

This centrifugal pump is designed for various water pumping applications. Its centrifugal design ensures efficient water transfer, making it suitable for residential, commercial, and industrial uses.

Overview

MKP Series Centrifugal Pump

The MKP series centrifugal pump is engineered for versatile water transfer across residential, commercial, and industrial environments. Its robust construction ensures long-lasting durability, while the efficient centrifugal design provides optimal flow rates and pressure. Designed with maintenance and installation in mind, this compact unit is an ideal solution for water supply, irrigation, and pressure boosting systems.

Key Features

Design Advantages

- Robust construction for durability
- Compact footprint for easy installation
- Engineered for efficient water transfer
- Optimized for flow rate and pressure

Suitable Applications

Residential Water Supply, Commercial Use, Industrial Applications, Irrigation Systems, Pressure Boosting
