

Centrifugal Water Pump for Fluid Transfer

This centrifugal water pump is designed for fluid transfer applications. It features a durable motor and pump housing for reliable performance.

Product Overview

Centrifugal Water Pump

This robust centrifugal water pump is engineered for reliable fluid transfer across a variety of demanding applications. Designed with a durable motor and high-quality pump housing, it ensures consistent performance and efficient water movement. It is an ideal solution for irrigation systems, water circulation, and general industrial fluid handling needs.

Technical Specifications

Key Construction Features

- Durable motor construction
- Reinforced pump housing
- Designed for consistent pressure

Pump Type

Centrifugal

Suitable Applications

Irrigation, Water Circulation, Industrial Use
