

Centrifugal Water Pump for Fluid Transfer

This centrifugal pump is designed for fluid transfer applications. It features a robust construction ensuring consistent flow rates and pressure, ideal for water circulation and boosting.

Product Overview

High-Performance Double Stage Centrifugal Pumps

The 2CPM series double-stage centrifugal pumps are engineered with twin impellers to deliver reliable performance in pressurization units for domestic, civil, and industrial applications. These pumps are specifically designed to handle demanding tasks such as sprinkling irrigation, well-pumping, and general water supply systems. With robust construction, they ensure consistent flow rates and pressure for various fluid transfer needs.

Operating Conditions

Max Fluid Temperature	35 °C
Max Operating Depth	5 m
pH Range	6 - 8.5

Technical Specifications

Model Performance Data

Model	Power (kW)	Power (HP)	Max Flow (l/min)	Max Head (m)	G.W (kg)
2CPM-130	0.75	1	90	44	15
2CPM-140H	1.1	1.5	110	54	21
2CPM-140M	1.1	1.5	160	47	21
2CPM-160	1.5	2	125	66	25
2CPM-160B	1.5	2	180	58	25

Suction Lift	9 m
