

Centrifugal Water Pump for Fluid Transfer

This centrifugal water pump is designed for fluid transfer applications. Its robust construction includes a volute casing, impeller, and suction/discharge ports, making it suitable for industrial and agricultural uses.

Overview

Centrifugal Water Pump Overview

This centrifugal water pump is engineered for efficient fluid transfer across diverse industrial and agricultural applications. Featuring a robust construction with a durable volute casing and precision-engineered impeller, it provides reliable performance in demanding environments. Designed for versatility, this unit supports a range of suction and discharge configurations to meet specific operational requirements.

Technical Specifications

Model	CB50-130
Pump Type	Centrifugal
Suitable Applications	Industrial, Agricultural, Fluid Transfer

Design Features

Key Components

- Robust volute casing
- High-performance impeller
- Optimized suction port
- Optimized discharge port
