

Centrifugal Water Pump for Industrial and Agricultural Use

This high-performance centrifugal water pump is designed for industrial and agricultural applications. The robust pump features a cast iron construction, ensuring efficient and reliable operation for transferring clean water and non-corrosive liquids.

Overview

Industrial-Grade Centrifugal Pump

This high-performance centrifugal water pump is expertly engineered to meet the rigorous demands of both industrial and agricultural environments. Built with a heavy-duty cast iron construction, it ensures exceptional longevity and durability in challenging conditions. The integrated powerful electric motor provides reliable liquid transfer, making it an ideal solution for moving clean water and non-corrosive fluids with maximum efficiency.

Technical Details

Construction Material	Cast Iron
Primary Applications	Industrial, Agricultural, Water Transfer

Operational Features

Fluid Compatibility

- Clean Water
- Non-corrosive liquids

Maintenance

Easy Maintenance • Field Serviceable
