

Centrifugal Water Pump for Irrigation

This centrifugal water pump is engineered for agricultural drainage and irrigation. Its durable cast housing ensures long-lasting performance and easy integration into existing machinery.

Product Overview

Professional Irrigation Performance

The H102 is a robust centrifugal water pump engineered for reliable performance in agricultural drainage and irrigation. Its durable cast housing ensures longevity, while the compact design allows for seamless integration into existing irrigation machinery. This pump is specifically designed to handle clean water and non-corrosive fluids, providing a stable flow for optimal crop water distribution.

Technical Specifications

Housing Material	Cast
Compatible Fluids	Clean water, Non-corrosive fluids

Performance Metrics

Key Performance Indicators

0 GPM

Max Flow Rate

0 PSI

Max Head Pressure

Maintenance & Compatibility

Maintenance Features

- Easy maintenance access
- Compatible with various engine types
- Designed for repairability
