

Centrifugal Water Pump for Irrigation and Drainage

Centrifugal water pumps are designed for irrigation and drainage applications. These pumps feature cast iron housings and precision-engineered impellers for efficient water transfer.

Overview

Professional Irrigation and Drainage Solutions

These robust centrifugal water pumps are designed for high-efficiency water transfer in demanding environments. Featuring durable cast iron housings and precision-engineered impellers, they ensure reliable performance across agricultural, industrial, and marine applications. Multiple configurations are available to meet precise flow rate and pressure needs for your specific project.

Technical Specifications

Available Models

- 280 Water Pump
- 240 Water Pump
- 6N630 Marine Water Pump

Housing Material

Cast Iron

Applications

Core Use Cases

Agricultural Irrigation, Water Drainage, Industrial Processing, Marine Systems
