

Centrifugal Water Pump for Irrigation and Water Transfer

This self-priming centrifugal water pump is designed for irrigation, drainage, and general water transfer. It features durable cast iron construction and an efficient impeller design.

Overview

Professional Irrigation and Transfer Solution

This high-performance centrifugal water pump is engineered for demanding irrigation, drainage, and water transfer tasks. Built with durable cast iron, it ensures long-term reliability in agricultural and industrial settings. The unit incorporates an efficient impeller design and a high-quality mechanical seal to provide consistent flow and pressure for clean water and light trash applications.

Technical Specifications

Priming Type

Self-priming

Housing Material

Cast Iron

Mechanical Seal Type

High-reliability mechanical seal

Impeller Design

High-efficiency centrifugal design

Applications

Suitable Fluids

- Clean water
- Light trash water

Primary Applications

Irrigation, Drainage, Water Transfer
