

Centrifugal Water Pump for Irrigation and Water Transfer

This self-priming centrifugal water pump is suitable for irrigation, water transfer, and pressure boosting. It features a cast iron pump body and impeller for durability and is designed for clean water applications.

Product Overview

Versatile Centrifugal Irrigation Solution

This self-priming centrifugal water pump is engineered for reliability in diverse professional applications, including irrigation, water transfer, and system pressure boosting. Built with a heavy-duty cast iron body and matching impeller, it ensures long-term durability in demanding environments. The motor is fully enclosed to provide superior protection against dust and water ingress, making it an ideal choice for consistent clean water management.

Technical Specifications

Motor Protection Rating

Dust Proof • Water Ingress Protected

Suitable Applications

- Agricultural irrigation
- Water transfer systems
- Pressure boosting
- Clean water handling

Pump Type

Self-priming Centrifugal

Construction Materials

Cast Iron Body, Cast Iron Impeller
