

Centrifugal Water Pump for Residential and Commercial Use

This centrifugal pump is designed for various water pumping applications. Its robust construction ensures durability and it is suitable for residential and light commercial use.

Overview

Reliable Centrifugal Water Pump

The PK60 series centrifugal pump is engineered for versatile water pumping applications, serving both residential and light commercial needs. Designed for efficiency and durability, this unit excels in water supply systems, irrigation, and pressure boosting tasks. Its compact and quiet-running architecture ensures easy installation and flexible placement across various environments.

Technical Specifications

Key Features

- Robust construction for long-lasting durability
- Quiet operation
- Compact design for flexible installation
- Efficient fluid handling

Series	PK60 Series
Application Areas	Residential, Light Commercial, Irrigation, Water Supply, Pressure Boosting
