

Ceramic Grain Abrasive Cloth

This abrasive cloth features high-performance ceramic grain for aggressive grinding and extended lifespan. Its Y-weight polyester backing ensures durability and tear resistance during demanding applications.

Product Overview

High-Performance Ceramic Abrasive

This ceramic grain abrasive cloth is engineered for heavy-duty cold grinding applications, offering exceptional performance on challenging materials like stainless steel, titanium, and high-alloy steels. Built with a heavy Y-weight polyester backing, it provides superior durability and tear resistance for aggressive material removal. Its design ensures a long service life and high-efficient grinding, making it an ideal solution for demanding metalworking and industrial finishing tasks.

Technical Specifications

Abrasive Material	Ceramic Grain
Backing Material	Heavy Y-weight Polyester
Grinding Mode	Dry Grinding

Applications

Usage Environment

- Metalworking
- Woodworking
- Composite Applications

Compatible Equipment

- Portable Belt Sanders
- File Belt Sanders
- Backstand Idlers

Compatible Materials

Stainless Steel, Chromium Steel, Chromium-Nickel Steel, High-Alloy Steel, Titanium Alloy

Performance Metrics

Performance Features

Cold Grinding • High Cutting Volume • Long Service Life • High Efficiency
