

Ceramic Lined Electric Water Heater

This electric water heater features a ceramic-lined tank for durability and corrosion resistance. It provides efficient hot water for residential and commercial applications.

Overview

Classic Series Electric Water Heater

The Classic Series is an economical and high-capacity solution designed for demanding hot water needs in both residential and commercial environments. Featuring a titanium blue ceramic-lined tank and high-density insulation, it ensures long-term durability and exceptional thermal retention. With a wide range of tank capacities and heating element options, this series provides a versatile and reliable hot water supply backed by a 7-year warranty.

Technical Specifications

Available Tank Capacities

- 100 Liters
- 150 Liters
- 200 Liters
- 300 Liters
- 400 Liters
- 500 Liters

Heating Element Power Options

- 1,500 W
- 2,000 W
- 3,000 W
- 4,000 W
- 5,000 W
- 6,000 W

Heating Element Material

Incoloy 840

Performance & Efficiency

Insulation Performance

40 kg/m³

Insulation Density

50 mm

Insulation Thickness

7 °C

Max Temp Drop (Overnight)

Efficiency Features

Non-CFC Foam Insulation, High Density Material, Eco-friendly, Thermal Retention

Durability & Protection

Titanium Blue Enamel & Anode Protection

The tank features a titanium blue enamel coating that meets drinking water standards and resists high temperatures up to 85°C. A sacrificial magnesium anode rod is integrated to neutralize corrosive effects, significantly extending the service life of the unit.

Tank Warranty

7 years

Compliance & Safety

Safety Certifications

KC Certificate • CB • SASO • UL

Design Features

Hot Water Delivery

Integrated dip tube design optimizes hot water delivery from the top of the tank.
