

Ceramic Plate Hair Straightener with Adjustable Temperature

This hair straightener features ceramic-coated plates, ensuring even heat distribution. The device includes adjustable temperature control and a swivel cord for ease of use.

Product Overview

Professional Ceramic Hair Straightener

This professional-grade hair straightener features advanced ceramic-coated plates designed for even heat distribution and reduced hair damage. Equipped with a reliable PTC heating element, it offers adjustable temperature settings between 180°C and 200°C to accommodate various styling needs. The design prioritizes user convenience with a 360° swivel power cord, a lockable handle for easy storage, and an integrated LED indicator.
