Product Overview

High-Performance Variator Sliders

These variator sliders are engineered specifically for CF500 and CF800 engines, providing a critical link in the CVT system of ATVs and UTVs. Designed to ensure smooth and efficient power transmission, they are built from durable materials capable of withstanding the high stress and temperatures of off-road environments. Replacing worn sliders with these high-quality components helps maintain optimal vehicle responsiveness and extends the overall service life of the transmission system.

Compatibility

Vehicle Types

- ATV (All-Terrain Vehicle)
- UTV (Utility Task Vehicle)

Engine Compatibility

CF500, CF800

Technical Features

High-performance variator slider designed for efficient power transmission in ATVs and UTVs.

Constructed from durable materials to withstand high stress and wear in off-road conditions.

Material Properties

- High-stress resistance
- Temperature resistant
- Durable construction for off-road use

Performance Benefits

Smooth Shifting • Enhanced Responsiveness • Extended Service Life • OEM Quality Standard

Primary Function

Ensures smooth and efficient power transmission within the variator system.

Application Details

High Quality, Low Cost

Essential component for maintaining or restoring optimal performance to the vehicle's transmission system.

Installation Type

Direct replacement part for easy installation.

Maintenance Role

Ideal for replacing worn or damaged sliders to restore optimal variator function.
