

CFL Triple Tube Lamp for Packaging Machinery

This compact fluorescent lamp (CFL) features a triple-tube design used in packaging machinery for illumination. It provides energy-efficient lighting and is suitable for consistent illumination in packaging processes, aiding in quality control and operational efficiency.

Product Overview

Industrial Illumination Solution

This compact fluorescent lamp (CFL) features a specialized triple-tube design engineered for use in packaging machinery. It provides consistent and energy-efficient lighting, which is essential for maintaining quality control and operational visibility in industrial environments. With a long lifespan and low heat output, this lamp is a reliable choice for demanding packaging processes.

Technical Specifications

Lamp Type	Compact Fluorescent Lamp (CFL)
Design	Triple-tube, U-shape design, Parallel tubes
Base Material	White plastic

Operational Benefits

Key Advantages

- Energy-efficient operation
- Long operational lifespan
- Low heat output
- Consistent illumination for quality control

Primary Application

Packaging Machinery • Industrial Lighting
