

CG200 196cc Motorcycle Cylinder Kit with 63.5mm Bore

This kit is designed for CG200 type motorcycle engines, featuring a 63.5mm bore and a 196cc capacity. It is air-cooled and includes the cylinder, piston, and related components.

Product Overview

High-Performance CG200 Cylinder Kit

This 196cc motorcycle cylinder kit is specifically designed for CG200 type air-cooled engines, featuring a precision-engineered 63.5mm bore. The kit is built for durability and optimal heat dissipation, ensuring reliable performance under demanding operating conditions. It serves as a comprehensive solution for engine maintenance or performance enhancement, including the cylinder block and essential piston components.
