

CGZ180 Diesel Engine

The CGZ180 is a robust diesel engine designed for varied applications. It features efficient fuel consumption, durable construction, and a compact design suitable for powering agricultural machinery, construction equipment, and other industrial uses.

Overview

CGZ180 Diesel Engine Overview

The CGZ180 is a robust, single-cylinder, horizontal, water-cooled, four-stroke diesel engine designed for versatility and reliability. It features a compact and lightweight architecture that ensures easy installation, minimal vibration, and smooth operation. Engineered for practical use, this engine is an ideal power source for micro-tillers, irrigation systems, air compressors, and various agricultural processing machinery.

Technical Specifications

Engine Structure	Single-cylinder, horizontal, water-cooled, four-stroke
Combustion Chamber Type	Direct injection
Cylinder Diameter	80 mm

Performance Metrics

Key Performance Metrics

5.67 kW
Rated Power

2600 r/min
Rated Speed

75 kg
Net Weight

Dimensions

Dimensions (L x W x H)	625 x 341 x 463 mm
------------------------	--------------------

Features

Key Advantages	Lightweight, Easy Installation, Low Vibration, Smooth Operation, Easy Maintenance
----------------	---

Applications

Primary Applications

- Micro-tilling machinery
- Irrigation and drainage
- Air compressors
- Agricultural product processing machinery
