

Chain Assembly for Plate Making Machinery

This heavy-duty chain assembly is designed for plate making and printing machinery. It features a robust master link connected to two chain legs for secure and reliable lifting or suspension.

Product Overview

Heavy-Duty Chain Assembly

This heavy-duty chain assembly is engineered specifically for the rigorous demands of plate making and printing machinery. Featuring a robust master link connected to two durable chain legs, it provides a secure and reliable solution for lifting or suspension tasks. Constructed from high-strength steel, this assembly ensures long-lasting performance and safety in demanding industrial printing environments.

Technical Specifications

Material	High-strength steel
Configuration	Double-leg chain with master link

Applications

Key Features

- Robust master link connection
- Dual-leg design for stability
- High-strength steel construction
- Designed for industrial durability

Primary Applications	Plate Making Machinery, Printing Presses, Plate Handling Equipment
