

Chain Conveyor System

This chain conveyor system is a robust and reliable solution for material handling in various industrial applications. Its heavy-duty chain and sprocket system ensures continuous operation and the ability to handle a wide range of materials, including abrasive and heavy items.

Overview

Robust Material Handling Solution

The 320-620 series chain conveyor is a robust and reliable solution designed for continuous material handling across various industrial applications. Featuring a heavy-duty chain and sprocket system, it is engineered to transport a wide range of materials, including abrasive and heavy items. Its modular design ensures easy customization and seamless integration into existing production lines.

Technical Specifications

Series Model	320-620 Series
Key Features	Adjustable Speed Control, Overload Protection, Heavy-duty Construction, Modular Design

Applications

Suitable Industries

- Mining
- Agriculture
- Manufacturing
