

Chain Hoist Hook with Safety Latch

This chain hoist hook is designed for lifting applications. It is constructed from high-strength steel and includes a safety latch to prevent load disengagement.

Product Overview

Professional Lifting Solutions

This heavy-duty chain hoist hook is engineered for demanding industrial environments, including factories, mines, and the petrochemical sector. Designed with a focus on safety and reliability, it features an integrated safety latch to prevent accidental load disengagement. Constructed from high-strength steel with a corrosion-resistant finish, it ensures long-term durability for critical lifting operations.

Technical Specifications

Lifting Capacity

5 tons

Minimum Capacity

150 tons

Maximum Capacity

Available Configurations

- Swivel hook with latch
- G80 U.S. type master link assembly
- G80 Italian type clevis slip hook with latch
- European type swivel self-locking hook

Material & Finish

High-strength steel • Corrosion-resistant • Safety latch equipped

Application & Usage

Suitable Industries

Manufacturing, Mining, Petrochemical, Chemical Industry, Maritime, Agricultural Construction
