

Chainsaw Bar with Replaceable Sprocket Nose

Professional bar designed for lightweight high-speed chain saws. It is ideal for pulpwood harvesting, commercial thinning, farming and logging.

Product Overview

Professional Chainsaw Bar Design

This chainsaw bar features a slim contour design for excellent maneuverability during operation. Constructed from super-tough chrome-moly steel, it offers superior bar-body strength and durable rails that resist wear and chipping. The inclusion of a replaceable nose sprocket kit ensures easier maintenance and extended service life for professional users.

Technical Specifications

Maintenance Features

- Replaceable nose sprocket kit
- Hardened guide rails
- Precision-machined oil passages

Bar Length Range	11-24 inches
Available Gauges	.050, .058, .063
Available Pitches	.325", 3/8"
Material	Chrome-moly steel
