Product Overview

High-Performance Lightweight Guide Bar

This advanced chainsaw guide bar is engineered for versatility and durability in forestry and landscaping applications. Featuring a specialized lightweight construction with an integrated plastic core and conductive aluminum element, it offers improved handling and reduced user fatigue. Designed for extreme environments, this guide bar provides high thermal resistance and stable performance across a wide range of operating conditions.

Technical Specifications

Key Features

- Conductive element for enhanced safety
- Lightweight composite construction
- Heat and cold resistant design
- High-stability manufacturing

Performance Metrics

6 inch

Minimum Length

42 inch

Maximum Length

Available Lengths

6 inch - 42 inch

Materials

60Si2 Steel, Aluminum, Plastic

Safety & Compatibility

Safety Standards

Conductive Element • Protective Cover Compatible
