Product Overview

Professional Grade Chainsaw Guide Bar

Engineered for high-performance forestry and landscaping applications, this guide bar features robust alloy construction for superior rigidity and bending resistance. The hard nose design significantly reduces wear, ensuring an extended service life even in demanding environments. Compatible with a wide range of chainsaw sizes, this bar is built to withstand extreme temperatures while maintaining consistent cutting precision.

Technical Specifications

Environmental Resistance

Heat Resistant • Cold Resistant

Material Composition

60Si2 Steel, USA Alloyed Powder, Germany Alloyed Strip

Available Lengths

6 inch - 42 inch

Key Features

Performance Highlights

6 inch

Min Length

42 inch

Max Length

Design Advantages

- Hard nose for reduced wear
- High-strength alloy construction
- Enhanced rigidity
- Bending resistant
