

# Chalk Line Reel for Marking Surfaces

This tool is used to mark straight lines on surfaces. It is used in carpentry, construction, and masonry.

## Product Overview

### Professional Marking Tool

This chalk line reel is an essential instrument for carpentry, construction, and masonry projects. Designed for marking long, straight lines on flat surfaces, it offers precision that exceeds manual methods or straightedges. The tool features a durable reel housing a chalk-coated string, allowing users to snap perfect layout lines quickly and efficiently.
