

Chamfer Deburring Drill Bit with Display Box

This drill bit is designed for efficiently chamfering and deburring various materials. Its robust construction ensures durability and allows for smooth, precise chamfering, providing a clean and professional finish.

Product Overview

Professional Chamfer and Deburring Solution

This versatile chamfer and deburring drill bit is engineered for high-performance material finishing. Constructed from durable High-Speed Steel (HSS), it ensures long-lasting performance across a variety of applications. Designed for compatibility with standard power drills, it delivers smooth, precise results on metals, plastics, and wood, making it an essential tool for metalworking and woodworking professionals.

Technical Specifications

Material	HSS (High-Speed Steel)
Size Range	8-22 mm

Features

Storage	Includes Display Box
Compatible Materials	Metal, Plastic, Wood
