Product Overview

Industrial Charcoal Briquette Crusher

This industrial-grade crusher is specifically designed to process various charcoal and coal briquettes into fine powder or small pieces. Utilizing a dual-stage rotor system, it delivers high-efficiency grinding suitable for charcoal production lines, metallurgy, and construction industries. Its compact design and adjustable fineness settings make it a versatile, space-saving solution for commercial and industrial charcoal processing operations.

Technical Specifications

Key Features

- Adjustable output fineness
- Two-stage crushing process
- Wear-resistant alloy hammers
- Compact, space-saving design

Crushing System

Two-stage series connected rotors with high-quality alloy hammerheads

Compatible Materials

Charcoal Briquettes, Coal Briquettes, Coal Powder

Applications

Suitable Industries

Charcoal Processing • Metallurgy • Highway Construction • Railway Construction • Water Conservancy
