

Chassis Anti-Rust Soundproof Adhesive

This is a long-term, efficient adhesive for chassis anti-rust and anti-corrosion. The product provides a prominent soundproof effect and strong anti-impact force.

Overview

Professional Chassis Protection

This high-performance chassis adhesive provides a dual-action solution for vehicle maintenance by combining long-term anti-rust protection with effective soundproofing. Engineered to withstand harsh environments, it offers strong anti-impact resistance to protect the underbody from road debris and corrosion. The formula is designed for durability, ensuring the vehicle's chassis remains shielded while significantly reducing cabin noise for a more comfortable driving experience.

Key Features

Primary Benefits

Anti-Rust • Anti-Corrosion • Sound Proof • Anti-Impact

Technical Specifications

Net Weight

2000 G

Performance

Protection Capabilities

- Long-term efficient anti-rust barrier
- Advanced anti-corrosion chemical properties
- Prominent soundproof acoustic effect
- High-strength anti-impact force resistance

Application

Application Area

Vehicle Chassis and Underbody
