

Check Valve

This check valve allows flow in one direction. It prevents backflow in pipelines and systems.

Product Overview

High-Intensity Discharge Lighting

This Xenon High-Intensity Discharge (HID) headlight bulb is engineered for superior automotive visibility. Utilizing a glass tube filled with xenon gas and metal halide salts, it generates an intense arc between two electrodes for optimal illumination. Designed with standard electrical connectors, this bulb ensures a straightforward installation process into compatible headlight housings.

Technical Details

Technology	Xenon High-Intensity Discharge (HID)
Materials	Glass, Xenon Gas, Metal Halide Salts

Installation

Connector Type	Standard electrical base connectors
Compatibility	Compatible with standard automotive headlight housings
