

Checkerboard Pattern Safety Bollard

This cylindrical safety bollard features a checkerboard pattern for high visibility. Constructed from durable plastic, it is designed for traffic management and pedestrian safety.

Product Overview

High-Visibility Safety Bollard

This cylindrical safety bollard is designed for effective traffic management and pedestrian safety in high-traffic areas. Featuring a high-contrast checkerboard pattern of alternating orange and black squares, it ensures maximum visibility for drivers and pedestrians alike. The durable construction is built for outdoor use, while the unique castellated top design suggests compatibility with modular or interlocking barrier systems.

Design & Features

Pattern Style	Checkerboard (Orange/Black)
Top Configuration	Castellated (Interlocking capable)
Material	Durable Plastic

Application

Primary Use Cases	Traffic Management, Pedestrian Safety, Outdoor Barrier, Modular Systems
