

Chemical Processing Blender with Grinder Attachment

This chemical processing equipment features a robust blender with a glass container and a stainless steel base. It includes a separate grinder attachment for various processing needs.

Product Overview

Professional Chemical Processing Solution

This chemical processing blender is engineered for versatility and durability in laboratory or small-scale industrial environments. Featuring a robust stainless steel base and a high-quality glass container, it ensures chemical resistance and stability during operation. The system includes a dedicated grinder attachment, making it a dual-purpose tool for both liquid blending and dry material processing.

Design & Construction

Safety Features

- Secure locking lid
- Stable base design

Construction Materials

Stainless Steel Base, Glass Container

Operational Capabilities

Processing Modes

Blending • Grinding

Control Type

Multi-speed control knob
