

Chemical Processing Blenders with Variable Speed Control

High-performance blenders designed for chemical processing applications. Models KF-813PG and KF-813P feature variable speed control and a pulse function for precise mixing and blending.

Product Overview

High-Performance Chemical Processing Blenders

These industrial-grade blenders are engineered specifically for demanding chemical processing applications. Featuring robust construction, they are designed to provide reliable operation and precise mixing control in professional environments. The lineup includes specialized options to handle a variety of substances, from corrosive materials to lighter compounds.

Technical Specifications

Available Models

- KF-813PG (Glass Jar)
- KF-813P (Plastic Jar)

Material Compatibility

Model	Container Material	Best For
KF-813PG	Glass	Corrosive substances
KF-813P	Plastic	Lighter materials

Control Features

Variable Speed Control, Pulse Function
