Product Overview

Industrial Grade Protection

These chemical-resistant safety gloves are engineered for reliability in hazardous environments. Compliant with CE EN374 standards, they offer robust protection against a wide range of chemicals, making them suitable for demanding industrial and laboratory applications. Designed with a unique palm texture, they ensure superior grip and flexibility for safe handling during complex tasks.

Technical Specifications

Material	Natural latex
Length	33 cm
Available Sizes	S, M, L

Features & Compliance

Compliance

CE EN374

Key Features

- Unique palm texture for anti-slip grip
- Chemical resistant construction
- Extended cuff for forearm protection

Applications

Recommended Industries

- Automotive
- Furniture Renovation
- Chemical Industry
- Car Washing
- Mechanical Maintenance
- Yard Work
