

Chemical Transfer Pump

This chemical transfer pump is engineered for efficient fluid transfer in industrial settings. Its durable construction and optimized hydraulic design make it suitable for handling corrosive and aggressive chemicals, ensuring safe and consistent performance.

Product Overview

Robust Chemical Transfer Solution

The JAZ series standard chemical pump is a robust and reliable solution engineered for demanding industrial fluid transfer applications. Featuring an optimized hydraulic design and durable construction, it is specifically built to handle corrosive and aggressive chemicals safely. This unit is coupled with a high-efficiency electric motor, ensuring powerful, consistent, and dependable operation in challenging processing environments.

Key Features

Key Benefits

Corrosion Resistant • High Efficiency • Easy Maintenance • Vibration Reduction

Technical Specifications

Pump Type	Standard Chemical Pump
Mounting	Sturdy base mounted
Suitable Applications	Chemical Processing, Industrial Fluid Transfer, Aggressive Media Handling
